Python 3: Avançando na orientação a objetos
Python 3 parte 2

Matheus Thibau

Frontend Engineer
Belo Horizonte, Minas Gerais, Brazil

Summary

Frontend Software Engineer with 15+ years in software development and 8+ years strongly focused on frontend and web applications. Expert in modern JavaScript/TypeScript ecosystems, frontend architectures, UI/UX collaboration, and performance-driven development. Experienced working in international, distributed teams, open-source projects, and mission-driven products. Strong advocate of clean code, maintainability, and measurable user impact.

Experience

Rhizomatica
Frontend Engineer
March 2022 - Present (4 years 4 months)
Pennsylvania, United States

Open-source communication platform enabling data exchange via shortwave radio for underserved communities.

Key Contributions & Impact

Led frontend redesign of the HERMES App, significantly improving usability and engagement.

Built and improved UI integrations with SDR and GPS hardware systems. Collaborated with designers and researchers to align UI decisions with real-world constraints.

Performed code reviews and architectural improvements, increasing maintainability and development velocity.

Tech Stack: Angular, TypeScript, JavaScript, REST, WebSocket, Python, PySide6, Git

MTP Inovação
Software Engineer
January 2019 - Present (7 years 6 months)

Belo Horizonte, Minas Gerais, Brasil

Provided consulting for developing, supporting, and maintaining web, mobile systems,

e-commerce, and online sales support for various clients (Frontier, Exodus Pratas,

Outlab, Aliança Comunicação, R33, GetNine, 4Hoofs, InDesign, MSA Advogados, Circuito

Turístico Trilhas do Rio Doce, Fundação Lucas Machado (FELUMA)).

Tags: PHP, Lumen Laravel, REST, JavaScript ES6, TypeScript, MySQL, Joomla, Shopify, Meta Ads.

Sisloc Softwares

Frontend Engineer

May 2025 - November 2025 (7 months)

Belo Horizonte, Minas Gerais, Brasil

Led the architecture and development of an institutional frontend framework built with Vue.js and Vuetify, establishing componentization strategies, design system principles, and coding standards. Worked alongside the architecture team to drive frontend governance, scalability, and cross-application consistency.

Bernoulli Educação

Frontend Engineer

June 2020 - September 2022 (2 years 4 months)

Belo Horizonte, Minas Gerais, Brasil

Large-scale educational platform serving hundreds of thousands of students.

Key Achievements

Developed a learning resources module serving 300,000+ students.

Built frontend for essay correction systems used in ENEM mock exams.

Led major refactors to improve code quality and frontend architecture.

Conducted code reviews and mentored junior/intern developers.

Fundação Educacional Lucas Machado

Software Engineer

January 2019 - June 2020 (1 year 6 months)

Belo Horizonte, Minas Gerais, Brasil

Analyzed and developed web/mobile educational and hospital management software.

- Maintained and developed new MEC (Ministry of Education) requirements for the CPA (Own Evaluation Committee) for over 2,000 students and 1000 employees.
 - Led and developed a new dashboard panel for monitoring and actively supporting internal service orders, reducing the average order waiting queue from over 100 to less than 10.
- Tags: JAVA, SPRING, Maven, JSF, JPA, JSP, REST, JavaScript ES6, TypeScript, React, SQL Server, Sourcetree, Git.

4milk

Frontend Engineer

June 2016 - January 2019 (2 years 8 months)

Belo Horizonte, Minas Gerais, Brasil

Farm and cattle management platform with web, mobile, and desktop clients.

Impact

Built frontend solutions supporting 5,000+ users.

Helped increase farm production from 2,000 to 3,000 liters/day via data-driven UI tools.

Designed offline-first UI workflows for low-connectivity environments.

Sisloc Softwares

Frontend Engineer

June 2015 - June 2016 (1 year 1 month)

Belo Horizonte, Brasil

Analysis and development of Web/Mobile content management system (CMS)

Conservation International

IT Assistant

February 2014 - March 2015 (1 year 2 months)

Belo Horizonte, Minas Gerais, Brasil

Support for access controls, hardware, software, networks, telephony and internet for 8 offices in Brazil with more than 70 users. Configuration and routine maintenance of backups and software development.

MCJ Tecnologia da Informação

Software Engineer

November 2013 - February 2014 (4 months)

Belo Horizonte, Minas Gerais, Brasil

Web development of software for scheduling medical appointments.

Banco Rural S/A

Software Engineering Trainee

March 2013 - October 2013 (8 months)

Belo Horizonte, Minas Gerais, Brasil

Web development of Internet banking software. Component administration with CentraSite - Software AG, Impact Analysis with META3AI and mentoring of new users.

Conservation International

Trainee

May 2012 - March 2013 (11 months)

Belo Horizonte, Minas Gerais, Brasil

User support, access controls, hardware, software, network, infrastructure, telephony, internet. Routine configuration and backup maintenance. Web development.
